BACKGROUND

Barron's career began in his native England as a junior scientist for a U.K. government research department, studying the technical functionality of nuclear particle accelerators. After immigrating to Canada, he became a member of the Bell Northern Research team that developed and implemented advanced digital telephone switching systems.

In 1979, he began his climb to the top of executive management starting as Director of Manufacturing Operations for Northern Telecom. His corporate career reached its apex during tenure as President/CEO of numerous technology companies including General DataComm; Telenex Corporation, Inc.; Bourns Electronics; and Valor Electronics (a publicly held company with over \$120 million in revenues) before becoming a partner in Allen Barron, Inc.

Today, Barron serves as a business firm advisor, and assists with strategy analysis and management consulting with a unique global perspective that provides a competitive advantage to Allen Barron, Inc's clients.
